PART 3290—TEXTILE, CLOTHING AND LEATHER

[Conservation Order M-47, as Amended July 31, 1946]

BURLAP AND OTHER JUTE GOODS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of burlap for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3290.256 *Conservation Order M-47—(a) What this order does.* This order contains restrictions on the sale, purchase and use of burlap produced in India. The order states the quantities of burlap which may be obtained for purposes other than the manufacture of bags. It does not restrict the importation of burlap and Order M-63 no longer controls burlap imports. Other orders and regulations of the Civilian Production Administration contain provisions affecting burlap, in particular Order M-221 which restricts the manufacture and use of new burlap bags.

(b) *Kind of burlap covered by this order.* The restrictions of this order apply only to burlap cloth produced in India, plain woven of single yarns of jute, 32 inches or more wide and weighing more than 6 and not more than 16 ounces a yard of cloth 40 inches wide, but not including brattice cloth, linoleum cloth, damaged burlap which is not suitable for the purposes for which it was intended or processed items made from burlap cloth. Whenever the word "burlap" is used in this order, it means only this kind of cloth. This order places no restrictions on buying, selling or using processed items made from burlap cloth.

(c) *Buying and selling burlap.* No person shall buy or sell burlap unless the purchase order bears the certificate specified in paragraph (i).

(d) [Deleted July 31, 1946]

(e) *Burlap for the manufacture of bags.* Bag manufacturers may buy any quantity of burlap for the manufacture of textile bags under the provisions of Order M-221, on orders bearing the certificate specified in paragraph (i), subject to the inventory limitations in paragraph (j) below.

(f) *Burlap for purposes other than the manufacture of bags—(1) Former users.* Any person, including a bag manufacturer, wanting burlap to use for a purpose other than to make bags (including a manufacturer of processed items other than bags which he will sell to others) may buy for delivery in any calendar month up to one-thirty-second of the total quantity of burlap in bales used by him for all manufacturing purposes other than bag-making, in 1939 and 1940 or 5 bales whichever is greater.

(2) *New users.* Any person, including a bag manufacturer, wanting burlap to

use for manufacturing purposes other than bag-making, but who did not use burlap for non-bag-making purposes in both 1939 and 1940, may buy not more than 5 bales of burlap a month for such purposes; if he wants to buy more than 5 bales of burlap a month, he may apply for an authorization by sending a letter to the Civilian Production Administration, Textile Division, Washington 25, D. C., Ref.: M-47. The letter should state the amount of burlap needed, the purpose for which it will be used, and the number of yards of burlap that the applicant is equipped to use in a month. Authorizations will be granted on an equitable basis in view of the allocations given to other manufacturers.

(3) *Acceptance of carload deliveries.* If a person is authorized under this paragraph (f) to buy in one month half a carload of burlap or more, but less than a full carload, he may buy a full carload, if his inventory before the delivery does not exceed a 30-day supply at his current or scheduled method and rate of operation.

(4) [Deleted Mar. 26, 1946.]

(g) *Dealers.*—(1) *Purchases to fill orders already received.* Any person may buy burlap to fill orders already placed with him for bag making and other manufacturing purposes and bearing the certificate specified in paragraph (i), in addition to the quantities which he may buy under paragraphs (e) and (f).

(2) *Purchases of burlap to be held for resale.* Any person may buy burlap to be held for resale for bag making and other manufacturing purposes if the purchaser places on his purchase order the certificate specified in paragraph (i). Burlap may be bought under this paragraph in addition to the quantities which may be bought under paragraphs (e) and (f). However, no person may take delivery of burlap to be held for resale which will cause his inventory of burlap for resale to exceed 5 bales.

(3) [Deleted Mar. 26, 1946.]

(h) *Frozen burlap.* A person holding intact bales of burlap on December 11, 1945, which were not acquired under a burlap allocation certificate or an order bearing a preference rating may not sell or use the burlap except as permitted below:

(1) He may sell it to fill purchase orders bearing the certificate specified in paragraph (i) below.

(2) He may use it only in the quantity and for a purpose for which he is authorized to buy burlap under this order. If he does so, he must reduce the amount he may buy for delivery in any period by the amount of frozen burlap he uses in that period.

(i) *Certificate.* (1) Any person who places a purchase order for burlap must place on the purchase order the following certificate, signed manually or as provided in Priorities Regulation 7:

The undersigned purchaser hereby certifies that he is familiar with Conservation Order M-47 as amended and that the burlap covered by this purchase order is being acquired in accordance with paragraph () of Order M-47 and that the burlap so acquired will be used as provided in that paragraph.

Name of purchaser

By -----
(Duly authorized officer)

The purchaser should insert after the word "paragraph" in the certificate the identifying letter and number of the paragraph under which he is authorized to buy the burlap he is ordering. The standard certificate set forth in Priorities Regulation 7 may not be used instead of this certificate.

(2) A person who has placed the certificate given above on a purchase order must not use the burlap received under the purchase order except for the purpose indicated in the paragraph stated.

(j) *Inventory restrictions.* No person may accept delivery of burlap if his inventory of burlap is, or will be, more than a 90-supply based on his current or scheduled method and rate of operation.

(k) [Deleted July 31, 1946]

(l) *Saving clause.* Quotas, certificates, directions, allocations and authorizations issued under this order before any amendment of it remain in effect after the amendment unless specifically revoked or amended.

(m) *Appeals.* An appeal from the provisions of this order may be made by sending a letter in triplicate to the Civilian Production Administration, Textile Division, Washington 25, D. C., Ref.: M-47, referring to the specific provisions from which relief is requested and stating fully the reasons for the appeal.

(n) *Applicability of regulations.* This order and all transactions affected by it are subject to all applicable regulations of the Civilian Production Administration.

(o) *Communications.* All communications concerning this order should be addressed to the Civilian Production Administration, Textile Division, Washington 25, D. C., Ref.: M-47.

(p) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

Issued this 31st day of July 1946.

Section 11 of Revised Maximum Price Regulation 402 is amended to read as follows:

SEC. 11. *Maximum prices for Alaskan lumber.* (a) The basic maximum prices f. o. b. mill for shipments originating in Alaska and delivered to points within Alaska or outside the continental United States are the maximum f. o. b. mill prices set forth in article V plus an amount equal to freight under the Maritime Commission's published freight rate from Seattle, Washington, to the mill's shipping point including surcharges, War Risk insurance, and wharfage and handling charges under the published Seattle Wharfage and Handling rate for comparable lumber.

(b) The basic maximum prices f. o. b. mill for shipments originating in Alaska and delivered to a buyer in the continental United States who does not purchase for resale are the maximum prices arrived at according to paragraph (a) above: *Provided*, That the seller, before shipping the lumber, obtains a written statement in duplicate from the buyer certifying that the lumber is not purchased for resale and showing the location of the job site where the lumber will be used. The seller shall, prior to the first shipment of the lumber, mail one of the duplicate copies of the buyer's statement to the Office of Price Administration, Region IX, Fisheries Building, Washington 25, D. C., with a covering letter showing the name and address of the buyer, a complete description (including the quantity and any other specification affecting the maximum price) of the lumber sold, and the price charged.

¹ 11 F.R. 4331.

(c) For all other shipments originating in Alaska the regular basic maximum f. o. b. mill prices in Article V apply.

NOTE. The reporting provisions of this regulation have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

This amendment shall become effective July 30, 1946.

Issued this 30th day of July 1946.

PART 1384—HARDWOOD LUMBER PRODUCTS
[MPR 568, Amdt. 8]

HARDWOOD PLYWOOD

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Maximum Price Regulation 568 is amended in the following respects:

1. In section 2 (c) subparagraph (5) is amended to read as follows:

(5) *Sales by a new sales outlet other than a mill.* As used in this subparagraph "sales outlet" does not mean a mill and a "new sales outlet" means (i) a distribution plant or other sales outlet established subsequent to December 6, 1944, (ii) a sales outlet which was once in existence, was closed and then reopened subsequent to December 6, 1944, (iii) a sales outlet which, subsequent to December 6, 1944, had a change of location, ownership or control and (iv) an established sales outlet which acquires an interest in a mill subsequent to December 6, 1944.

In order to prevent violations of this regulation by unnecessary routing of hardwood plywood through sales outlets which are permitted to add a mark-up to the mill price, a new sales outlet is not permitted to sell hardwood plywood in excess of the maximum prices established in this regulation for a mill until the new sales outlet makes application to the Lumber Branch, Office of Price Administration, Washington, D. C., and obtains classification as a seller permitted under this regulation to sell at other than the mill level.

(i) *What the application must contain.* The "new sales outlet" shall apply for classification to the Office of Price Administration, Lumber Branch, Washington 25, D. C., and the application shall include the following information:

1. The complete name and location of the new sales outlet.
2. Names and addresses of the owners.
3. A description of the physical warehouse facilities.
4. The types and kinds of plywood to be sold.
5. Reason for choice of the location.
6. Names and addresses of sources of supply for hardwood plywood.
7. Type of business to be conducted and type and location of customers.

8. Names of any manufacturers of hardwood plywood, or other outlets of hardwood plywood, with which the applicant may be affiliated and the nature of such affiliation.

9. Whether any of the hardwood plywood to be sold is locally produced.

(ii) *Approval.* The Office of Price Administration shall issue a letter order establishing the classification of the new sales outlet upon finding that (1) the new sales outlet is properly identified under the provisions of Maximum Price Regulation 568 (2) the classification will not encourage evasion of the provisions in this regulation and (3) the classification is not contrary to the purpose and intent of the Emergency Price Control Act of 1942, as amended.

If a new sales outlet has no sales outlets established prior to December 6, 1944 and is under partial or complete joint control or ownership with a hardwood plywood mill, any order which may be issued classifying the new sales outlet as a distribution plant shall contain the limitation that the new sales outlet shall not sell hardwood plywood manufactured by the mill with which it is affiliated at prices in excess of the f. o. b. mill prices in this regulation.

If a new sales outlet has sales outlets established prior to December 6, 1944 and is under partial or complete joint control or ownership with a hardwood plywood mill, and if the new sales outlet is classified by the Office of Price Administration as a distribution plant, the affiliated mill shall not be permitted to sell through all of the sales outlets, including the new sales outlet, any greater percentage of the footage of hardwood plywood produced by that mill than was sold through all of its sales outlets in the first quarter of the calendar year of 1946.

If a new sales outlet acquires an interest in a hardwood plywood mill any order which may be issued classifying the new sales outlet as a distribution plant shall contain the limitation that the new sales outlet may not sell the production of the acquired mill at higher than the f. o. b. mill maximum prices in this regulation.

Any sales outlet which is permitted to sell hardwood plywood at a mark-up over f. o. b. mill prices under this regulation, and which was not affiliated with a hardwood plywood mill prior to December 6, 1944, shall not sell hardwood plywood at prices in excess of the f. o. b. mill prices in this regulation which is manufactured in a hardwood plywood mill acquired by that sales outlet subsequent to December 6, 1944.

In accordance with the provisions of this section, an application for classification as a sales outlet shall be denied or granted in whole or in part or subject to specified conditions. The classification may also be revoked or amended upon evidence that the classification granted to the sales outlet does not conform with the provisions of the regulation.

Prior to the effective date of the order classifying a new sales outlet it shall not make any sales of plywood at prices higher than the maximum mill prices contained in this regulation.

2. In section 3 (b) the heading of subparagraph (1) which reads "Technical

hardwood plywood" is amended to read as follows: "Technical hardwood plywood manufactured anywhere in the United States."

3. In section 3 (b) that part of subparagraph (2) which precedes the facsimile of Form 6073-2576 is amended to read as follows with Form 6073-2575 remaining as presently written:

(2) *Hardwood plywood manufactured in Zone 1, 2, or 3 and not specifically priced in Section 16, or not covered by subparagraph (1) above.* For hardwood plywood manufactured in Zone 1, 2, or 3, which is not covered in the tables in section 16 or in subparagraph (1) above, an application for price approval shall be submitted by the manufacturer in duplicate on Form 6073-2576, reproduced below.

4. A new subparagraph (3) is added to section 3 (b) to read as follows:

(3) *Hardwood plywood manufactured outside Zones 1, 2 and 3 and not covered by subparagraph (1) above.* For hardwood plywood manufactured outside Zones 1, 2 and 3 which is not covered in subparagraph (1) above, an application for price approval shall be submitted by the manufacturer in duplicate as provided in this subparagraph.

Not later than 15 days after the manufacturer accepts an order or quotes a price on an inquiry for hardwood plywood covered by this subparagraph (3), the manufacturer shall file an application for price approval with the Lumber Branch of the Office of Price Administration, Washington 25, D. C., in the manner provided below.

An application for a price approval under this subparagraph shall be made by the manufacturer in duplicate and shall include the following information:

(i) Complete description of the plywood to be priced, including (1) panel thickness, (2) number of plies, (3) species and grade of face and back, (4) species of inner plies, (5) any special figure or matching, (6) kind and formula of glue and glue test required, (7) any special construction, (8) sanding, and (9) size.

(ii) Requested price.

(iii) Detailed cost build-up of the requested price, or an explanation of how the price was derived, together with a showing that the requested price is at the general level of prices established by this regulation.

The applicant shall also submit other information which the Office of Price Administration may request, including a copy of the order or inquiry covering the plywood.

Each application shall cover only one specification of hardwood plywood even though the manufacturer is fulfilling an order involving more than one specification, and each application must be complete with all attachments. The applicant must number his applications serially beginning with Number 1.

No person shall deliver the plywood or collect payment or a portion of the payment for such plywood unless the manufacturer of the hardwood plywood files an application for price approval as provided in this subparagraph within the 15-day period described above.

As soon as an application for price approval containing all the information required in this subparagraph is filed by the manufacturer, the manufacturer may use the requested price as a tentative maximum price, but all quotations, contracts, and invoices must notify the buyer that the price is subject to approval by the Office of Price Administration. If the requested price is reduced by the Office of Price Administration, the seller shall within ten (10) days after he receives notice of such reduction refund any excess which he may have received over the price approved by the Office of Price Administration and revise any outstanding invoices, quotations, or contracts which may exceed the approved price.

Within thirty (30) days following receipt by the Lumber Branch of the Office of Price Administration of an application which is properly filed and contains all of the information required, the Office of Price Administration shall transmit to the manufacturer an approval of a maximum price. If the Office of Price Administration fails to send such price approval, the manufacturer may use as his maximum price the lesser of either:

(a) The price requested on the application, or

(b) The maximum price which the Office of Price Administration may have previously approved for that seller for the same item of plywood.

However, the maximum price in either (a) or (b) shall apply only to the one order covered by the application and only to the quantity of hardwood plywood covered by that order on the date of the application.

If the application has not been properly filed with complete information and attachments within the fifteen (15) day time limit as specified above, the requested price shall not be deemed approved even though the Office of Price Administration does not transmit an approval of a maximum price within the 30-day period described above.

A maximum price approved by the Office of Price Administration for an item of hardwood plywood covered by an application properly filed under this subparagraph (3) shall apply to subsequent sales by the same applicant (the seller) of the identical item of hardwood plywood unless the Office of Price Administration limits the applicability of the approved price in some manner.

A maximum price duly approved by the Office of Price Administration under this subparagraph may subsequently be reduced by the Office of Price Administration in regard to shipments made subsequent to a date specified by that Office, but such date shall not be earlier than the date of the notice of the reduction.

This amendment shall become effective July 30, 1946.

NOTE: All reporting and record keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 30th day of July 1946.

Administrator.

PART 1339—APPAREL

[MPR 572, Amdt. 4]

MANUFACTURERS' PRICES FOR CERTAIN FALL AND WINTER OUTERWEAR

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Maximum Price Regulation 572 is amended in the following respects:

1. The caption of Appendix D, immediately preceding subparagraph (a) thereof, is amended to read as follows:

"Appendix D: Part I—Procedure for calculating unit direct costs for garments delivered prior to July 1, 1946."

2. The following is added at the end of Appendix D: Part I:

Part II—Procedure for calculating unit direct costs for garments delivered on or after July 1, 1946—(a) When you figure a garment's direct cost. Prior to the first time after July 1, 1946, that you deliver a particular style number of winter garment, you must calculate the garment's direct cost (in accordance with paragraphs (b) (1), (c) and (d) below). This direct cost figure must be used in determining your maximum price for sales and deliveries of the garment during a three months calendar or fiscal period. At the end of that period, and at the end of every three months period thereafter (if you plan to continue sales or deliveries of the garment), you must refigure the cost of the materials used in the garment (in accordance with paragraph (b) (2) below). Do not refigure the direct labor and trimming costs originally calculated for the garment. If the new material cost is less than 95% of the material cost first calculated for the garment, your maximum price must be figured on the basis of the new material cost (and the direct labor and trimming costs originally calculated), and you must use this revised maximum price for all your sales and deliveries of the garment during the next three months period. If the new material exceeds the original material cost, you may increase your maximum price for the next three months period in accordance with the new material cost.

The three months period for recalculation of the cost of the material are determined as follows:

(1) Calendar period. Recalculation of material cost must be made on January 1, April 1, July 1, and October 1 of each year. For example, if your direct cost calculation for a garment is made on August 15, 1946, you must recalculate material cost on October 1, 1946, January 1, 1947, April 1, 1947, etc.

(2) Fiscal period. Recalculation of material cost must be made on the first day of each quarter of your fiscal year. For example, if you operate on the fiscal period November 1 to October 31, you must recalculate material cost on each November 1, February 1, May 1 and August 1.

(3) Fifteen day tolerance. The previously established maximum price for a garment need not be changed until

fifteen days after the date when you were required to recalculate materials cost.

If the garment is a "new model" (i.e., not the "same" as any style number manufactured by you prior to July 1, 1946, as defined in paragraph (b) (1) (iii) below) there is an additional requirement. At the end of the first three months calendar or fiscal period that is sold or delivered under the regulation, you must recalculate not only the cost of materials used in the garment, but also the amount of such materials used (in accordance with paragraph (b) (2) below). At the end of each subsequent period, however, recalculate only the cost of materials as outlined above.

(b) How to find material costs—(1) Calculating material costs for the first three months period a garment is sold or delivered under the regulation after July 1, 1946—(i) Old models. For a garment which is the "same" as a style number manufactured by you prior to July 1, 1946 ("same garment") is defined in paragraph (iii) below, you find material cost for the first three months period as follows:

Step 1. Find the weighted average cost, per foot or per yard of each type of material used in the garment. To do this:

(a) Find from your invoices the total yardage or footage of each such material which was delivered to you between April 1 and June 30, 1946, and the net invoice cost of each yard or foot of such material. (If no deliveries of a particular type of material were received during that period, use the invoices for deliveries of such material received between January 1 and March 31, 1946. If no deliveries were received between January 1 and June 30, 1946, base your calculation on the deliveries of such materials which have been received between July 1, 1946, and the time your calculation is being made; if no deliveries have been received during this period, base your calculation on contract for the purchase of such material entered into prior to the date your calculation is being made.)

Net invoice cost means the lower of (a) the actual cost shown on the invoice after deduction of all available discounts, or (b) the maximum price that the supplier of the material is permitted to charge you at the time of delivery under the regulations of the Office of Price Administration; provided that the supplier is one of your customary suppliers. If the supplier is not one of your customary suppliers, net invoice cost means the lower of (a) the actual cost shown on the invoice after deduction of all available discounts, or (b) the maximum price which you could be lawfully charged at the time of delivery by one of your customary suppliers. (Customary suppliers are the suppliers of the same class [i. e., mills, converters, jobbers, importers, etc.] as those from whom you purchased substantial quantities of material between 1941 and 1944, or, if you did not purchase materials between 1941 and 1944, the class of suppliers from whom your closest competitors purchased substantial quantities of materials between 1941 and 1944.)

If your operations are integrated (i. e., if you fabricate or process any material used in the garments which you manufacture), net invoice cost means a cost no higher than the net maximum price which you could have charged for such material under the terms of the OPA price schedules and maximum price regulations in effect on the date of completion of the fabrication had you sold it to another manufacturer.

However, if you received an order under Section 4 of Supplementary Order 133 prior to July 1, 1946, you must use, as a definition

of "net invoice cost," the definition in effect under this regulation prior to July 1, 1946, until revocation of such order.

(b) For each material, multiply each different net invoice cost by the quantity of such material received at that cost, and total the products.

(c) Divide the sum found in (b) for each material by the total quantity found in (a) for that material.

Step 2. Find the average amount of each type of material used in the garment. To do this, consult your cutting records for this garment for a representative period prior to July 1, 1946 (not less than three consecutive months), wherein you cut the average size or size range in which you customarily sell the garment and find the number of garments cut and the total quantities of each type of material used. Divide the total quantity of each type of material by the number of garments cut.

(a) If the garment was manufactured by you during 1944, for your calculation under this Step 2 you must use your cutting records for this garment for a representative period in 1944 (not less than three consecutive months).

(b) If the garment was first manufactured by you subsequent to December 31, 1944, and prior to July 1, 1946, for your calculation under this Step 2 you must use the average yardage figure found from your cutting records for the first three months period in which you cut the average size or size range in which you customarily sell the garment.

Step 3. Multiply the weighted average cost of each material (found in Step 1) by the average amount of each material used in the garment (found in Step 2).

NOTE. Before you sell or deliver the garment, you must prepare and keep a record of: (i) the calculations made under Step 1 above for each type of material used (in detail similar to Form III in Example 4 of Part I of this Appendix); (ii) the calculations made under Step 2 above for each type of material used (in detail similar to Form IV in that same example); and (iii) the total direct material cost which you have found for the garment (in detail similar to Form VI in Appendix F). In addition, you must preserve the invoices or contracts for purchase of materials and cutting records on which your material cost calculations are based.

(ii) **New models.** For a garment which is not the "same" as a style number manufactured by you prior to July 1, 1946, you find material cost for the first three months period as follows:

Step 1. Find the weighted average cost, per foot or yard, of each type of material used in the garment. Follow the procedure outlined in Step 1 of paragraph (i) above.

Step 2. Find the average amount of each type of material to be used in manufacturing the garment. To do this, run a trial cutting of the average size or size range in which you expect to manufacture the garment, and determine the number of garments cut and the quantity of each type of material used in that cutting. Then divide the total quantity of each type of material consumed by the number of garments in the cutting.

Step 3. Multiply the weighted average cost of each type of material (found in Step 1) by the average amount of each type of material used in the garment (found in Step 2).

NOTE: Before you sell or deliver a garment you must prepare and keep a record of: (i) the calculations made under Step 1 above for each type of material used (in detail similar to Form III in Example 4 of Part I of this Appendix); (ii) the calculations made under Step 2 above (showing date trial cutting made, cutting ticket number, number of garments cut, and footage or yardage of each type of material used); and (iii) the total direct material cost which you have found

for the garment (in detail similar to Form VI in Appendix F). In addition, you must: preserve the invoices or contracts for purchase on which your material cost calculations are based, and the pattern used for your trial cutting; prepare and keep records of your cutting experience during the first three months period (in detail similar to Form IV in Example 4 of Part I of this Appendix).

(iii) **Same garment.** A garment is considered the "same" as another when:

(a) The garment belongs to the same group, as listed in Appendix A;

(b) The garment contains body material and lining which are the same with respect to construction, weight and grade, finish, including shrinkage treatment, and color fastness;

(c) The garment consumes substantially the same average yardage or footage per dozen or per unit of body materials and lining and has substantially the same body dimensions;

(d) The garment contains trimmings of fairly equivalent serviceability;

(e) The garment is constructed and assembled with the same standards of workmanship and inspection.

Differences in color which ordinarily have not been the basis of differences in price shall be disregarded.

(2) **Calculating material costs for sales and deliveries of garments in subsequent periods.** At the beginning of each three months period subsequent to the first three months period after July 1, 1946, in which a garment is sold or delivered, you must, before making any sales or deliveries of the garment in the new period, recalculate the cost of the materials used in the garment (the periods for recalculation are described in paragraph (a) above). The new material cost shall be the weighted average cost of the quantities of each type of material used in the garment which you have received during the three months period just completed. (If at the time of making your first recalculation after July 1, 1946, you have not operated under the regulation for three months, base your calculation on the materials received between May 1, 1946, and the date when you are required to make your recalculation.) To determine this weighted average cost, use your invoices for shipments received during the three months period just completed, and follow the procedure outlined in Step 1 of paragraph (i) (i) above. Then, multiply the weighted average cost so found for each type of material by the average amount of such materials used in the garment (the figure already found in Step 2 of paragraph (i) (i) or (i) (ii) above).

For a new model, at the beginning of the second three months period after July 1, 1946, in which that model is to be sold or delivered, you must recalculate not only the cost of materials, but also the average amount of each type of material used in the garment. To determine this figure, consult your cutting records for that model during the first period, and find the total number of garments cut and the total quantity of each type of material used; then divide the total quantity of each type of material used by the total number of garments cut. At the beginning of subsequent

periods, recalculate only the cost of materials, as outlined above.

NOTE: Before you make sales or deliveries of a garment in a new period, you must prepare and keep a record of the calculations made in refiguring your cost of materials. Incorporate this record as a continuation of the form similar to Form III in Example 4 of Part I of this Appendix which you previously prepared for the first period after July 1, 1946, the garment was sold or delivered. You must also record the recalculated total direct material cost of the garment on your control record (Form VI in Appendix F), which you previously prepared for this garment during the first period.

In addition, for new models, you must prepare and keep a record of the calculations made in refiguring the amount of material used. Incorporate this record as a continuation of Form IV. You must also enter this recalculation on Form VI.

(c) **How to find trimming costs.** The cost of trimmings used in a garment shall be the weighted average net invoice cost of such trimmings which were received between April 1 and June 30, 1946. Find this weighted average cost by the same method you used for materials, outlined in Step 1 of paragraph (b) (1) (i) above.

The cost of thread, tape, labels and hangers may be calculated without reference to the particular type of thread, tape, etc., to be used in a particular garment. To determine the cost of thread, for example, you may calculate the weighted average cost of all types of thread received by you during the period selected for your calculations, and use that thread cost for all garments priced under the regulation.

NOTE: Before you sell or deliver a garment, you must prepare and keep a record of: (1) the calculations made in figuring your trimming cost (in detail similar to Form III in Example 4 of Part I of this Appendix) and (2) the total trimming cost which you have found for the garment (in detail similar to Form VI in Appendix F). In addition, you must preserve the invoices or contracts for purchase of trimmings on which your trimming cost calculations are based.

(d) **How to find direct labor cost—(1) Piece-work operations.** For operations compensated on a piece-work basis, cost must be figured on the basis of "approved" piece-work rates in effect on June 30, 1946. "Approved" piece-work rates as used herein are those approved within the requirements of Subpart C of the Supplementary Wage and Salary Regulations issued by the Office of Economic Stabilization on March 8, 1946.

(2) **Time operations.** For operations on a time basis costs are figured in the manner indicated below, using the "approved" wage rates in effect on June 30, 1946. ("Approved" wage rates are defined in (1) above.)

You will note that the instructions below require a comparison between your payroll for each time operation during a specified period and the number of garments on which that operation was completed during that period. If your records require, you may group all your garments together. If possible, however, you must segregate your garments by group, by style, or otherwise.

For example, if your records show how much of your cutters' payroll goes into mackinaws, you must segregate mackinaws from your other garments. If your

records show how much of your cutters' payroll goes into mackinaws in the \$20-\$30 range, you must segregate mackinaws in that price range from your other mackinaws. If your records show how much of your cutters' payroll goes into plaids, you must segregate plaids from solids.

(i) *Old models.* For a garment which is the "same" as a style number manufactured by you prior to July 1, 1946, you find the cost of each time operation by dividing your payroll for the operation during the representative period prior to July 1, 1946 (not less than three consecutive weeks), by the number of garments on which that operation was completed during that period.

(a) If the garment was manufactured by you during 1944 you must use the representative period in 1944 (not less than three consecutive weeks) that you used for that garment under (d) (2) (i) of Part I of this Appendix, except that you may use the "approved" wage rates in effect on June 30, 1946.

(b) If the garment was first manufactured by you subsequent to December 31, 1944, and prior to July 1, 1946, you must use the representative period (not less than three consecutive weeks) you previously used for that garment under (d) (2) (ii) of Part I of this Appendix, except that you may use the "approved" wage rates in effect on June 30, 1946.

(ii) *New models.* For a garment which is not the "same" as a style number manufactured by you prior to July 1, 1946, you find the cost of each time operation according to one of two rules. Select the rule which will work better for your business, and then you must use it for all new models.

Rule 1. Use as the cost of each time operation the cost of that time operation found under paragraph (i) above. If you segregated your paragraph (i) costs by group number, price line, or style, use the most comparable basis for your new model.

For example, if under (i) you segregated your mackinaws from your jackets, you use for your new mackinaws the mackinaw cost which you found under (i).

Rule 2. Have each time operation performed on the new model for a period (not exceeding three weeks). Then, divide your payroll for each operation during this period by the total number of garments on which the operation was completed.

For example, a mackinaw manufacturer's cutters work on one new model for three weeks. During that period, they cut 1,000 garments, including the new model. His cutting cost is calculated by dividing his cutters' payroll for three weeks by 1,000.

(3) *Contractors' services.* For garments fabricated by a contractor, figure as a direct labor cost an amount equal to 70% of the contractor's net service charge for direct labor, markup on direct labor, and any trim furnished by the contractor.

NOTE: Before you sell or deliver a garment, you must prepare and keep a record of: (a) its direct labor cost (in detail similar to Form VI in Appendix F); and (b) the calculations made in figuring the direct labor cost of operations compensated on a time basis (in detail similar to Form VII in Appendix G). Moreover, you must preserve all of the records on which your calculations of direct labor cost are based, including pay rolls, cutting records, contractors' invoices.

This amendment shall become effective July 30, 1946.

NOTE: The reporting and record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 30th day of July 1946.

PART 1426—WOOD PRESERVATION AND PRIMARY FOREST PRODUCTS

[MPR 491, Amdt. 3]

PRESSURE PRESERVATIVE TREATMENT OF FOREST PRODUCTS AND PRESSURE TREATED FOREST PRODUCTS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Maximum Price Regulation 491 is amended in the following respects:

1. In section 2, the first paragraph is amended to read as follows:

SEC. 2. Summary of the regulation. This regulation covers sales of pressure treating service, and also establishes a formula by which to arrive at maximum prices for the sale of pressure treated products. Thus, the coverage of the regulation falls into two divisions: (a) Sales of treatment service only where the forest products treated are not supplied by the seller of the treatment, and (b) sales of treated forest products where both products and treatment are supplied by the seller except the sales through distribution yards covered by Second Revised Maximum Price Regulation 215 and Maximum Price Regulation 467.

2. In section 2, the second paragraph is deleted.

3. In section 7, paragraph (b) (2) is amended to read as follows:

(2) For pressure treated fence posts, lumber, switch ties, cross ties and other sawn material:

(i) Lumber, switch ties and other sawn material (except cross ties):

	Percent
5,000 to 10,000 board feet.....	10
Less than 5,000 board feet.....	25

(ii) Cross ties:

125 to 250 cross ties.....	10
Less than 125 cross ties.....	25

(iii) Fence posts:

Less than 500 posts.....	10
--------------------------	----

4. In section 7, a new paragraph, designated (c) is added, to read:

(c) *For pressure treated poles sold by retail lumber yards.* When a purchaser's order requires delivery of less than 5,000 pounds of pressure preservative treated poles from the stock of a retail lumber yard, an addition of not more than 25% of the total invoice value, exclusive of all transportation charges, may be made.

18 F.R. 15594; 9 F.R. 8182, 9955, 13857.

A retail lumber yard, for the purposes of this regulation, is a yard which gets lumber, pressure treated poles, and other merchandise from mills, other yards, or treating companies; unloads, sorts, stores, and resells the stock; regularly maintains a varied stock of lumber, pressure treated poles, and other merchandise; gathers such stock from different regions mostly by rail and, when making delivered sales of pressure treated poles, sells for delivery by truck within a radius of 25 miles from the yard; is equipped to make quick deliveries of many different items of yard stock, and which has been located at its particular site in order to be near a consuming area.

5. Section 8 (a) is amended to read as follows:

(a) If a seller wishes to sell a pressure preservative treatment, or a pressure treated product, or wishes to make an addition for special workings, specifications, services, (such as pressure treatment of odd shaped or fabricated materials), or other extras for which prices or additions are not specifically provided in this regulation, he must apply to the Lumber Branch, Office of Price Administration, Washington 25, D. C., for a maximum price. He must provide the following information:

- (1) The requested price;
- (2) A description of the item or service to be priced;
- (3) The price differential in effect between October 1, 1941, and June 1, 1942, from the seller's own records, between the item or service to be priced and the most comparable item or service priced in the price tables. If that is impossible, an estimated differential from the experience of the trade may be furnished. If no established price differential existed, a detailed analysis of the comparative values must be furnished.

6. In section 11 (b), a new subparagraph (9) is added to read as follows:

(9) Splitting up a single transaction or order into a series of smaller transactions or orders, where the total quantity involved exceeds that set forth in section 7 or section 19 (d) in order to receive the benefit of the small quantity sales additions provided in those sections.

7. In section 18 (b), the first paragraph is amended to read as follows: (Subparagraphs (1) through (6) remain unchanged.)

(b) *For sellers of pressure treated forest products other than cross arms (for cross arms see section 8),* the maximum prices shall be the sum of the following:

- (1) The maximum price for the unseasoned and untreated forest product as provided in the applicable maximum price regulation (in the case of poles or piling, the random length price, plus one and one-half cents per lineal foot is to be used);
- (2) the price of the preservative delivered to the seller's treating plant, plus one-quarter cent ($\frac{1}{4}$ ¢) per gallon in the case of creosote and mixtures thereof, or plus one and one-half percent ($1\frac{1}{2}$ %) of the delivered price in the case of salts or other preservatives; and
- (3) treating charges, as provided below, which include unlimited retort time, in-

cising of sawn material, if required, loading and unloading of trams, and all handlings. (For other allowable additions see sections 5, 7, and 21.)

8. In section 18, a third paragraph is added to the footnote applicable to Table 2 to read as follows:

Cubatures and estimated weights for "West Coast" species other than Douglas Fir will be provided upon application submitted to the Lumber Branch, Office of Price Administration, Washington 25, D. C., setting forth specifications and species to be sold.

9. In section 19 (b), the first paragraph is amended to read as follows: (Subparagraph (1) through (6) remain unchanged.)

(b) For sellers of pressure treated forest products, other than fence posts and cross arms (for fence posts see paragraph (c), and for cross arms see paragraph (d)), the maximum prices shall be the sum of the following: (1) The maximum price for the unseasoned and untreated forest product as provided in the applicable maximum price regulation (in the case of poles or piling, the random length price, plus three-quarters of a cent ($\frac{3}{4}c$) per lineal foot, is to be used), (2) the price of the preservative delivered to the seller's treating plant plus one-quarter of a cent ($\frac{1}{4}c$) per gallon in the case of creosote and mixtures thereof, or plus one and one-half percent ($1\frac{1}{2}\%$) of the delivered price in the case of sales or other preservatives, and (3) treating charges as provided below, which include the loading and unloading of trams and all handlings. (d) For sellers of pressure treated Southern Yellow Pine cross arms, the maximum price shall be the sum of the following: (1) The maximum carload price for the unseasoned and untreated Southern Yellow Pine lumber as provided in Second Revised Maximum Price Regulation 19, including applicable additions for surfacing and cutting to length as provided in that regulation, (2) 10 percent of (1) above for manufacturing waste, (3) \$0.01 per hole bored in "Standard" cross arms; \$0.015 per hole bored in "Special" cross arms; \$0.02 per hole bored in the Bell Telephone Company Type DE cross arms, (4) \$3.00 per M'BM rough lumber measurement for roofing, when required in specifications of the user, (5) The price of the preservative as provided in (2) of paragraph (b) of this section, and (6) Treating charges as provided in paragraph (b) (3) of this section.

A charge of not more than 25 percent of the total invoice value, exclusive of all transportation charges, may be added where the purchaser's order requires the shipment to move, and it actually does move at the less-than-carload freight rate, or by truck.

For transportation additions, see section 5.

NOTE: A "Standard" cross arm is one which requires one handling through the boring

machine. All holes are bored in a single operation.

A "Special" cross arm is one (other than Type DE) which requires more than one handling through the boring machine. Holes

are bored in more than one operation, and the bits are set for each operation.

It is ordered, that:

(a) *Back-hauling company material prohibited.* No common carrier by railroad, subject to the Interstate Commerce Act, shall transport coal or other material used by such railroad in its operations, usually referred to as "company material" in carloads, through the point or points at which such material is to be used or stored, to a more distant point, and back-haul such material to the point or points of use or storage.

PART 97—ROUTING OF TRAFFIC

REROUTING OF TRAFFIC; APPOINTMENT OF AGENT

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 26th day of July, A. D. 1946.

It appearing, that upon representations from the Office of Defense Transportation, and due to the fact that certain railroads have been unable to transport promptly carload and less-than-carload traffic offered to them so as to properly serve the public; the Commission is of opinion that an emergency exists requiring immediate action to best promote the service in the interest of the public and the commerce of the people.

Rerouting of freight traffic and empty cars; appointment of agent. (a) Homer C. King, Deputy Director, Office of Defense Transportation, Washington, D. C., is hereby designated and appointed an Agent of the Interstate Commerce Commission and vested with authority to divert or reroute all carload and less-than-carload freight traffic as well as empty freight cars from the line of any railroad or railroads subject to the Interstate Commerce Act, which in his opinion cannot currently accept and move such traffic or empty cars, over the line or lines of any other railroad or railroads less congested which are more able to handle the traffic or empty cars. Such rerouting or diversion shall be made regardless of the routing shown on the bill of lading designated by either shipper or carrier. Such diversion or rerouting shall be made by said Agent either at point of origin or as soon as possible after the shipment has left the point of origin.

(b) As Agent he is authorized to set up, subject to the approval of the Commission, an Advisory Committee on which shall be at least one representative of the Office of Defense Transportation, and one representative of the Association of American Railroads.

(c) As Agent he is hereby directed to avail himself of the facilities of the Association of American Railroads, its various departments, field forces, records, and reports.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Application.* The provisions of this order shall apply to intrastate as well as interstate commerce.

(g) *Effective date.* This order shall become effective at 5:00 p. m., July 26, 1946.

(h) *Expiration date.* This order shall expire at 11:59 p. m., December 31, 1946, unless otherwise modified, changed, suspended or annulled by order of this Commission. (40 Stat. 101, sec. 402, 41 Stat. 476, 485, secs. 4, 10, 54 Stat. 901, 912; 49 U. S. C. 1 (10)-(17), 15 (4))

It is further ordered, That a copy of this order and direction shall be served upon each State railroad regulatory body, all common carriers by railroad subject to the Interstate Commerce Act, and upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

[Order CMAN-8]

UNITED MINE WORKERS OF AMERICA WELFARE AND RETIREMENT FUND

PROCEDURE FOR MAKING PAYMENT AND REPORTING AMOUNT DUE

1. Paragraph 4 of the Krug-Lewis Agreement dated May 29, 1946 deals with the health and welfare program. Paragraph 4 (a) concerns "A Welfare and Retirement Fund," and states, "a welfare and retirement fund is hereby created and there shall be paid into said fund

by the operating managers 5¢ per ton on each ton of coal produced for use or for sale." This order is in reference only to paragraph 4 (a) and the instructions contained herein are not applicable to paragraph 4 (b) which sets up a medical and hospital fund.

2. For the purpose of the Welfare and Retirement Fund, a ton of coal consists of 2,000 pounds net. Railroad weights at the mines shall be used to determine coal produced for use or for sale whenever such weights are available. Where no railroad weights at the mine are available other transportation or shipping weights determined at the mine shall be used. Where railroad or other shipping or transportation weights are not available the most accurate and available weights or measures of usable or salable coal produced shall be used.

3. By Memorandum of Agreement dated June 27, 1946 (Order No. CMAN-5) the Coal Mines Administrator and the President, UMW, designated Rear Admiral W. J. Carter, SC, USN, Chief of the Bureau of Supplies and Accounts and Paymaster General of the Navy, as Custodian of this fund pending the appointment of trustees as required by the Krug-Lewis Agreement. No expenditure will be made from the fund which will be kept intact until accounting therefor is made to the trustees.

4. The name of the fund is "United Mine Workers of America Welfare and Retirement Fund."

5. The Custodian has made arrangements with the First National Bank of the City of New York, New York City, to act as the depository of the fund during the period of his custodianship.

6. Checks in payment of obligations to the United Mine Workers of America Welfare and Retirement Fund will be made to the order of the "United Mine Workers of America Welfare and Retirement Fund" and mailed directly to the First National Bank of the City of New York, New York City. The checks will be forwarded with a check letter of advice the original of which will accompany the check to the bank. A copy of the check letter of advice will be mailed by the operator to:

The Custodian, United Mine Workers of America Welfare and Retirement Fund, Room I-2032, Bureau of Supplies and Accounts, Navy Department, Washington 25, D. C.

7. In the near future there will be forwarded to each coal operator sufficient sets of check letters of advice to last about one year. They will have carbons inserted and each copy will be addressed specifically to the recipient. Pending receipt of the check letters with carbon inserts coal operators will be furnished with an ample supply of loose check letter forms. They should be mailed promptly and directly to the addressee appearing on each form.

8. For the purpose of an accurate record, it will be necessary that the Custodian have information on the "coal produced for use and for sale" from each mine operated by an operating agency. Space has been provided to insert this information in the check letter of advice.

If additional space is required, the data should be shown on the reverse side of the form or on a separate schedule securely attached to the form. Until further instructions are issued this will be the only report required of the coal operators in connection with the establishment of the United Mine Workers of America Welfare and Retirement Fund. It is important, therefore, that care be used in the preparation of these check letters of advice.

9. If an operator does not mine coal for a given period and therefore has not accrued any obligation under the United Mine Workers of America Welfare and Retirement Fund, notification should be forwarded by using the check letter of advice stating these facts. In this case the operator shall forward all copies to the Custodian at the address shown in paragraph 6.

10. Direct all communications having to do directly with matters pertaining to the fund to the Custodian at the address given in paragraph 6 above, but any matters having to do with interpretation of the Krug-Lewis Agreement or existing contracts should be referred directly to the Coal Mines Administrator, Department of the Interior, Washington 25, D. C.

11. This order shall be deemed to be a specific direction or order within the meaning of the terms and provisions of the Revised Regulations for the Operation of Coal Mines Under Government Control (11 F.R. 7567).

N. H. COLLISON,
Captain, U. S. N. R.,

Order A-3]

DOTEN-DUNTON DESK CO.

ADJUSTMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to Second Revised Order No. A-3 under § 1499.159b of Maximum Price Regulation No. 188, it is ordered:

(a) *Manufacturer's maximum prices.* Doten-Dunton Desk Company, Cambridge, Massachusetts, may increase its current maximum prices for sales of the office furniture which it manufactures,

by 24 per cent of each such maximum price.

(b) *Maximum prices of purchasers for resale.* A reseller shall calculate his ceiling prices by adding to his invoice cost the same percentage markup which he has on the "most comparable article" for which he has a properly established ceiling price. For this purpose the "most comparable article" is the one which meets all of the following:

(i) It belongs to the narrowest trade category which includes the article being priced.

(ii) Both it and the article being priced were purchased from the same class of supplier.

(iii) Both it and the article being priced belong to a class of articles to which, according to customary trade practices, an approximately uniform percentage markup is applied.

(iv) Its net replacement cost is nearest to the net cost of the article being priced.

The determination of a ceiling price in this way need not be reported to the Office of Price Administration; however, each seller must keep complete records showing all the information called for by OPA Form 620-759 with regard to how he determined his ceiling price, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

If the maximum resale price cannot be determined under the above method the reseller shall apply to the Office of Price Administration for the establishment of a ceiling price under § 1499.3 (c) of the General Maximum Price Regulation. Ceiling prices established under that section will reflect the supplier's prices as adjusted in accordance with this order.

(c) *Terms of sale.* Maximum prices adjusted by this order are subject to each seller's terms, discounts, allowances and other price differentials in effect during the base period, or which have been properly established under the applicable OPA regulation.

(d) *Notification.* At the time of, or prior to the first invoice to a purchaser for resale, showing a price adjusted in accordance with the terms of this order, the seller shall notify the purchaser in writing of the methods established in paragraph (b) of this order for determining adjusted maximum prices for resales of the articles covered by this order. This notice may be given in any convenient form.

The provisions of Supplementary Order No. 153 shall not apply to resale prices of articles covered by this order.

(e) *Revocation or amendment.* This order may be revoked or amended by the Price Administrator at any time.

(f) *Effective date.* This order shall become effective on the 29th day of July 1946.

Issued this 29th day of July 1946.

Administrator.

AUTHORIZATION OF MAXIMUM PRICES

Order No. 306 under Revised Supplementary Order No. 119. La Crosse

Cooler Company, La Crosse, Wisconsin. Docket No. 6123-119-172.

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register and pursuant to section 13 of Revised Supplementary Order No. 119: It is ordered:

(a) Maximum prices for the La Crosse Cooler Company of La Crosse, Wisconsin. (1) The above manufacturer shall determine his maximum prices for his line of commercial refrigeration equipment by increasing by 7.1 percent his prices on these items in effect on October 1, 1941 to each class of purchaser.

(2) Since the provisions of this order are not intended to reduce properly established maximum prices, the manufacturer may continue to use as his maximum prices to each class of purchaser his properly established prices in effect under Maximum Price Regulation No. 591 in the event that such prices exceed the prices in effect to each class of purchaser on October 1, 1941 plus the increase provided for in (1) above.

(3) The maximum prices set forth above shall be subject to discounts and allowances including transportation allowances and price differentials which are at least as favorable as those the manufacturer extended or rendered or would have extended or rendered to each class of purchaser on commodities in the same general category during March 1942.

(b) *Resellers' maximum prices.* All resellers of the commodities covered by this order (but not manufacturers who purchase such items for use in the manufacture of other products) may add to their presently established maximum prices the percentage increase in cost resulting from the increase granted the manufacturer by this order.

(c) *Notification to all purchasers.* The manufacturer shall send the following notice to every purchaser of the commodities covered by this order at or before the time of the first invoice after the adjustment granted by this order is put into effect:

Order No. 306 under Revised Supplementary Order No. 119 authorizes a 7.1 percent increase in October 1, 1941 net prices for sales of commercial refrigeration equipment manufactured by this company.

Resellers (but not manufacturers who purchase such items for use in the manufacture of other products) may add to their existing maximum prices the percentage increase in cost resulting from the adjustment granted by Order No. 306.

(2) For sales and deliveries by the manufacturer to all other classes of purchasers the maximum prices are the adjusted maximum prices set forth in paragraph (a) (1) of this order, adjusted to reflect the manufacturer's customary differentials for sales to those other classes of purchasers.

(b) *Resellers' ceiling prices.* Resellers of an article which the manufacturer has sold at an adjusted ceiling price determined under this order shall determine their maximum prices as follows:

(1) A reseller who had a properly established maximum price in effect before this order was issued for an article covered by this order may add to that maximum price an adjustment charge in the same dollar-and-cents amount as the adjustment charge authorized by this order for, and which he has paid to his supplier.

(2) If the reseller did not have a properly established maximum price for the article in effect before this order was issued he shall first determine a maximum price (exclusive of adjustment charges), and to that price he may add an adjustment charge in the same dollar-and-cents amount as the adjustment authorized by this order for, and which he has paid to, his supplier. To find his maximum price (exclusive of adjustment charges) for this purpose the reseller shall add to his invoice cost, less an adjustment charge stated on that invoice, the same percentage markup which he has on the "most comparable article" for which he has a properly established ceiling price. For this purpose the "most comparable article" is the one which meets all of the following tests:

(i) It belongs to the narrowest trade category which includes the article being priced.

(ii) Both it and the article being priced were purchased from the same class of supplier.

(iii) Both it and the article being priced belong to a class of articles to which, according to customary trade practices, an approximately uniform percentage mark-up is applied.

(iv) Its net replacement cost is nearest to the net cost of the article being priced.

The determination of a ceiling price in this way need not be reported to the Office of Price Administration; however, each seller must keep complete records showing all the information called for by OPA Form 620-759 with regard to how he determined his ceiling price, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

(3) If the maximum resale price cannot be determined under the above method the reseller shall apply to the Office of Price Administration for the establishment of a ceiling price under § 1499.3 (c) of the General Maximum Price Regulation. Ceiling prices established under that section will reflect the supplier's prices as adjusted in accordance with this order.

(4) The provisions of Supplementary Order No. 153 shall not apply to the determination of ceiling prices for resales of the articles covered by this order.

(c) *Terms of sale.* Ceiling prices adjusted by this order are subject to each seller's terms, discounts, and allowances on sales to each class of purchaser in effect during March 1942, or thereafter properly established under OPA regulations.

(d) *Change in resellers' margins.* Resellers' maximum prices adjusted in accordance with this order are subject to further adjustments which may result from any change in resellers' margins which may be effected by the Office of Price Administration to obtain absorption by resellers of any industry-wide increase in manufacturers' maximum prices.

(e) *Notification.* At the time of, or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing prices adjusted in accordance with this order, the seller shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted maximum prices for resale of the articles. This notice may be given in any convenient form.

The amount of the adjustment in maximum prices granted by this order must be stated separately on invoices to all classes of purchasers, except for sales at retail.

(f) All requests for relief contained in the applications of May 23 and May 28, 1946, that are not herein specifically granted, are denied.

(g) This order may be revoked or amended by the Price Administrator at any time.

(h) This order shall become effective on the 29th day of July 1946.

Issued this 29th day of July 1946.

method the reseller shall apply to the Office of Price Administration for the establishment of a ceiling price under § 1499.3 (c) of the General Maximum Price Regulation. Ceiling prices established under that section will reflect the supplier's prices as adjusted in accordance with this order.

(4) The provisions of Supplementary Order No. 153 shall not apply to the determination of ceiling prices for resales of the article covered by this order.

(c) *Terms of sale.* Ceiling prices adjusted by this order are subject to each seller's terms, discounts, and allowances on sales to each class of purchaser in effect during March 1942, or thereafter properly established under OPA regulations.

(d) *Change in resellers' margins.* Resellers' maximum prices adjusted in accordance with this order are subject to further adjustments which may result from any change in resellers' margins which may be effected by the Office of Price Administration to obtain absorption by resellers of any industry-wide increase in manufacturers' maximum prices.

(e) *Notification.* At the time of, or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing prices adjusted in accordance with this order, the seller shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted maximum prices for resale of the articles. This notice may be given in any convenient form.

The amount of the adjustments in maximum prices granted by this order must be stated separately in invoices to all classes of purchasers, except for sales at retail.

(f) This order may be revoked or amended by the Price Administrator at any time.

(g) This order shall become effective on the 29th day of July 1946.

Issued this 29th day of July 1946.

Administrator.
